EDUCATION

Emory University | B.S. in Data Science, Informatics Track **Expected Graduation: December 2027**

TECHNICAL SKILLS & CORE COMPETENCIES

Programming & Databases: Python (pandas, NumPy, scikit-learn) SQL (Joins, Aggregations, Subqueries), R, PostgreSQL, MySQL, Snowflake
Data Analysis & Visualization: Data Cleaning, Data Validation, ETL/ELT, Data Integration, Data Modeling, Exploratory Data Analysis (EDA), Statistical Analysis, Geospatial Analysis, Power BI, Tableau, Streamlit, Dashboard Development, KPI Reporting, Data Storytelling, Machine Learning
Tools & Business Skills: Excel (Pivot Tables, VLOOKUP/XLOOKUP), Jupyter Notebook, Git/GitHub, Decision-Support Analysis, Agile Methodology, A/B Testing, Hypothesis Testing

TECHNICAL PROJECTS

Fresh Food Access Dashboard | Python, Pandas, Geopandas, Matplotlib, Streamlit

- Independently developed and deployed an interactive dashboard featuring maps, dynamic filters, and tract-level KPIs across 211 Atlanta census tracts.
- Engineered a composite food-access need index using quantile-based scoring across 8,000+ records spanning SNAP participation, poverty, food retail availability, and MARTA access.
- Implemented geospatial classification and visualization tools to prioritize 53 census tracts for targeted intervention and support neighborhood-level investment recommendations.

American Airlines Delay Prediction | Python, XGBoost, SciKit-Learn, NumPy, Streamlit

- Led a 4-person team with an American Airlines stakeholder, guiding research on predicting flight-sequence disruptions using flight, crew, and weather data.
- Designed a decision-support framework to enhance decision-making for dispatchers and analysts by translating predictive model results (AUC ~0.66) into actionable insights on flight-sequence and operational disruptions.

PROFESSIONAL EXPERIENCE

Invest Atlanta (Atlanta Emerging Markets Incorporated)
Data Strategy & Analytics Intern **Sept 2026 — Present**

- Architected a centralized data infrastructure by integrating Excel records with external data sources, transforming 1,800+ records into an interactive Power BI dashboard to streamline reporting and track organizational impact.
- Cleaned, integrated, and analyzed 1,800+ records using Python, SQL, and Excel, consolidating internal and external datasets to support equitable economic development and investment analysis across Atlanta.
- Participated in 4 stakeholder investment meetings focused on education-related funding initiatives to identify opportunities to integrate external data and dashboards to support investment assessments and recommendations.

Invest Atlanta Partnership Incorporated
Team Lead & Data Analyst **Dec 2025 — May 2026**

- Developed Random Forest ridership models, analyzing MARTA accessibility and business disinvestment to identify 5 priority Neighborhood Statistical Areas (NSAs) for FIFA World Cup 2026™ investment planning.
- Led in collaboration with Invest Atlanta, translating stakeholder requirements into 2 data-driven initiatives focused on transit accessibility and food insecurity, aligning analytical deliverables with investment priorities.
- Directed geospatial research across 211 Atlanta census tracts, identifying 53 high-priority areas (25%) for food-access investment; presented findings at Emory's AI/Data Lab Symposium, earning Best Project Poster.

LEADERSHIP & INVOLVEMENT

Data Science Club, Team Lead, Data Analyst
Career & Professional Development: Technology, Data Sci, & Physical Sciences, Career Community Fellow
The Women's Network, Operations Committee
Handshake AI, AI Fellow
Makeup Club, Vice President & Publicity Chair, Social Media Manager
